JMP EXPANDS, ADDS YANMAR REPLACEMENT PUMPS

For 85 years, Yanmar has continued to exert a significant influence in marine propulsion, and is a favored brand within both the recreational and commercial markets. Now, JMP Marine has expanded its extensive line to include six new quality replacement pumps and impellers that fit 63 of Yanmar's more popular models.

JMP replacement pumps are manufactured to ISO 9001 standards for 100% drop-in compatibility. Superior to OEM, they're self-priming with a higher-than-average flow capacity. Built to last from cast bronze, they have marine-grade non-magnetic shafts, corrosion-resistant fittings and O-ring seals for a long, reliable service life. JMP offers models for Yanmar 2/3GMF, 2/3YM, 2/3GM, 4JH 90/180, 6LP, and 6LY2/3 series engines.

Every pump comes with a JMP Marine flexible impeller with a brass insert. The proven design is made from an innovative, wax-infused blend that resists salt, oil, chemicals and extreme heat. Tested and approved by the US Navy, they outlasted other brands by a margin of two to one.

JMP Marine replacement pumps for Yanmar come with a 1-year warranty and start at \$397 MSRP.

JMP Marine manufactures sea water pumps and strainers, and proven quality flexible impellers for OEM and aftermarket. They are available from a broad international network of dealers and distributors.
