JMP VOLVO PENTA REPLACEMENT PUMPS: BETTER THAN OEM

A vast number of commercial and recreational vessels worldwide are powered by Volvo Penta. JMP Marine manufactures 20 different flexible impeller replacement cooling pumps for 150 engine models, all with the proven reliability and superior quality that makes JMP better than even OEM.

100% drop-in compatibility is ensured with JMP Marine. Manufactured in its ISO 9001-certified factory, each replacement engine cooling pump is made from the finest cast bronze and machined to exacting standards. With stainless steel wear plates, heat-resistant fiber gaskets, corrosion-resistant fittings and marine-grade, non-magnetic shafts, OEM pales in comparison to JMP's build quality.

Self-priming, JMP replacement cooling pumps are engineered to deliver massive flow. This is due, in part, to their use of the company's renowned flexible impellers. Made of a unique, wax-infused proprietary blend, they resist salt, oil, chemicals and extreme heat. They're so durable, when tested by the US Navy, they outlasted all other brands by a margin of two to one.

JMP Marine Volvo Penta replacement pumps come with a 1-year warranty and start at \$420 MSRP.
