JMP ADDS TO WESTERBEKE/UNIVERSAL REPLACEMENT PUMP LINE-UP

Building upon its extensive line of replacement raw water cooling pumps for propulsion and generator engines, JMP Corporation has added two models specifically for Westerbeke/Universal. Its new JPR-WB10IP and JPR-WB7108IP versions join JPR-WB08IP as replacement solutions for close to 40 different Westerbeke/Universal engine models.

Manufactured to strict ISO-9001 standards, high-performance JMP pumps deliver 100% drop-in compatibility. Their heavy-duty bronze bodies are engineered and machined to exacting tolerances to deliver water flow that's superior to Westerbeke original equipment. Stainless steel wear plates, marine-grade non-magnetic shafts and O-ring seals instead of gaskets ensure a long, reliable service life with less maintenance.

Westerbeke replacement engine cooling pumps come with JMP's unique flexible impeller. A critical element in any pump's reliability, JMP's are made from a proprietary wax-infused polymer that doesn't wear prematurely or degrade under excess heat. Resistant to salt, oil and chemicals, the US Navy tested them and found they outlasted other brands by a margin of two-to-one.

JMP Corporation's pedestal-stye JPR-WB10IP has an MSRP of \$450 and replaces Westerbeke/Universal pump models 055624, 042026 and 046120, and Johnson Pump 10-24569-01. JPR-WB7108IP replaces

-more-

Westerbeke 042175 and Sherwood G908 and G903; its MSRP is \$468.75. JPR-WB08IP replaces Westerbeke 48080, 37431 and 33636, and Johnson 10-36006; its MSRP is \$543.75. They're backed by a one-year limited manufacturer's warranty.
