PUMPS & PARTS, IMPELLERS, STRAINERS, AND PROPELLERS!

JMP Marine products are designed and manufactured at its ISO9001 Certified Facility. JMP Corp is dedicated in using the highest-grade materials, machining to exact tolerances in its manufacturing process thus providing the **Quality / Performance / and Reliability** that JMP Marine is widely known for.

Do not make the mistake of concluding that JMP Products are just another aftermarket solution . . . **JMP Marine "The Only One" is a Brand Name manufacturer** that is producing quality long lasting Raw Water Pumps along with the Major & Minor Part Kits, Flexible & Bronze Impellers, and Strainers. The product line covers replacements for Cummins, Caterpillar, Detroit Diesel, Fisher Panda, John Deere, Kohler, Mase, Kubota, Mitsubishi, Northern Lights, Onan, Perkins, Volvo Penta, Westerbeke, Yanmar, Scania and More!

WHY USE JMP MARINE FLEXIBLE IMPELLERS vs ALL OTHERS?

- JMP Marine (JMP Corp) performs total **"IN HOUSE MANUFACTURING"** meaning that they do not outsource any part of the process, including materials, as all the other brands today must do. This ensures the highest standards of quality control making sure that their consumers, as yourself, have the utmost confidence and peace of mind that you are receiving a product without compromise. You will get the **QUALITY & PERFORMANCE** you are looking for and more!
- JMP Marine Flexible Impellers **DO NOT USE HARMFUL CHEMICALS** thereby ensuring the protection of our environment.
- JMP has developed a unique formula taken **OVER 40 YEARS OF EXPERIENCE** producing an impeller mixture that has been specifically designed for seawater & raw water applications resulting in a much more durable longer lasting product vs the Neoprene and Nitrile of other brands today.
- JMP Marine goes a step further . . . in developing an added mixture they call **"WAX BRANDING"** which is infused throughout the impeller material and has aided in the result of an impeller that can last up to 3 times longer than all others out there.
- JMP Marine uses **"BRASS INSERTS"** vs stainless steel. Even though this does take longer, it produces a machined product that is of better quality resulting in a much **MORE DURABLE LONGER LASTING PRODUCT.**

Also Introducing "KING DOLPHIN PROPELLERS"

Influenced by aerospace engineering technology . . . King Dolphin Propellers are formulated, designed and tested to be the BEST of all worlds!

- DURABLE AS TITANIUM
- LIGHT AS ALUMINUM
- RELIABLE AS STAINLESS STEEL
